ABOUT: The youth fair is a permanent committee of the DCLA. The Youth Fair Show Superintendent, Assistant Superintendent, and a Youth Fair Secretary-Treasurer will be elected officers to serve a one-year term. They would serve as ex-official members of the Board of Directors if not already an elected Board member. Successive terms would be subject to review by the Board of Directors. The Superintendent and Assistant Superintendent shall have the responsibility for coordinating the activities necessary to the operation of the Youth Fair. The Youth Fair Secretary-Treasurer will coordinate the printing of the rulebook; tag-in and entry information for youth fair; order the fair supplies, ear tags, awards, etc; collect all monies in connection with youth fair and disburse funds for expenses, judges, premiums, scholarships, and sales.

FAIR DATES: The 2025 DCLAYF will be held March 31, 2025 through April 5, 2025 unless postponed, shortened, or extended by the Board of Directors, which they reserve the right to do if deemed necessary for the general welfare of all concerned.

LIABILITY STATEMENT: All exhibitors and exhibits shall comply with these Rules. DCLA shall not be liable to exhibitor for lost profit or other financial loss of any type or description including any special, indirect, reliance, incidental or consequential damages which may be caused directly or indirectly by the enforcement of these Rules, or for any time delays, inadequacies of services of DCLA or any use of the premises or by any deficiency or defect therein. Additionally, DCLA is not responsible for any loss, injury or damage caused by exhibitor or exhibitor's property that may arise directly or indirectly from exhibitor's participation at the Youth Fair. An exhibitor who violates any of the following rules may forfeit all privileges, fees paid and premiums and be subject to such penalty as the Executive Committee may order. The failure of the DCLAYF to enforce any of the provisions, rules, rights, or remedies of this premium list or to exercise any options or sanctions herein provided will in no way be construed to be a waiver of such provisions, rules, rights, remedies, sanctions, or options. Special rules or conditions are published in each department where necessary. However, an exhibitor may show four (4) entries from the market animal divisions with a limit of two (2) per species.

2. All market animals except market rabbits must be owned by the exhibitor and will be permanently identified by the superintendent of each division at the state validation times. All state-validated animals will be cross-referenced to prove ownership. Market rabbits will be validated (tattooed)

ENVIRONMENTAL SCIENCE SPECIAL RULES

- a) Exhibits are to reflect part of exhibitor's learning experience in the entomology/nature collections project.
- b) Exhibitors may enter as many classes as they would like but may exhibit two entries per class.

- c) *Specimens in the collection should be properly labeled for identification with both common and scientific names clearly legible, with date and location collected.*
- d) Collections are to be placed in a shadow box not to exceed 24" x 36". Dried plant collections may be exhibited in a shadow box or in a binder.
- e) Specimens in a collection may be carried over from year to year, as long as they are in good condition and mounted properly. As the project moves from one phase to another, a substantial number of new specimens should be added.
- f) Specimens in plant collections should be dried, pressed and mounted on a heavy sheet of paper of a size sufficient to accommodate the entire specimen. As many plant parts as possible should be included: foliage, flowers, roots, seeds, and fruits. Fruits and seeds may be displayed in envelopes of suitable size attached to the specimen sheet. Stems should be folded and glued on the paper in a zigzag pattern to reduce the specimen size and allow the use of as small a specimen sheet as possible. Expose both sides of leaves and flowers to display as many plant details as possible. Avoid using more glue than necessary to attach the specimen. Credit will be given for neatness of presentation and specimen condition. Classes may be broken further depending on the species entered, and may include grasses, forbs, cultivated plants, wildflowers, and woody plants. Only one specimen of a given species should be entered in any given plant collection.
- g) Dried plant arrangements may be exhibited in a vase or other container.
- h) Credit will be given to all nature collection exhibits for completeness of information provided, such as where the specimens were found, date collected, site conditions, etc.
- i) Collections may consist of any number of items, but credit will be given for larger collections which have a broader and more complete representation of the class: for example, all other things considered equal, a collection of 12 wildflower specimens representing 12 different families would be judged higher than 12 wildflower specimens representing only five different families. Credit will be given for the quality of specimens exhibited.
- j) Educational entries may include exhibits showing life cycles of insects, life cycles of plants, effects of pesticides on insect pests, artistic use of insects, bees, honey, spider collections, etc. In any case, actual insect/plant specimens or other nature objects must be included. Posters, signs, and pictures may be used to supplement the exhibits. NOTE: Spiders are NOT insects and may only be included in educational exhibits.
- k) Emphasis in judging will be placed on the overall variety of specimens represented in the collection, accuracy of identification, skill and technique acquired in mounting of specimens and overall arrangement and appearance of the collection.
- l) Insect specimens grouped within order.

1. **Entries are subject to all general rules.**
2. Entries will be divided into these age divisions by March 1, 2025:
 - a) Junior: (age 12 — 14)
 - b) Senior: (age 15 — 18)
 - c) (Contestants must take a 15-question test and must pass to advance to the driving portion of the contest. The test will be about Safety, Maintenance & History of Tractor's)
3. Equipment utilized
 - a) Tractor
 - b) 3 point equipment
4. Scoring — Contestants are assessed penalty points for safety violations, time, hit markers, etc., according to the attached score sheet.
5. Judges — Judges are appointed and will rule on all questions. The judges' interpretations of the rules are final.
6. Awards — Buckles will ONLY be given to the 1st place operators in the Senior and Junior Division.

Contest Guidelines

The contest will consist of mounting a tractor, starting it safely and correctly, and driving the indicated course. The contest requires the contestant to drive and back a tractor with the trailer attached. Stakes or cones will outline the course.

1. Starting the tractor engine — Upon mounting the tractor, the contestant will be responsible for the following items:

The tractor will then be started and run at idling speed until the contestant is to start driving.

- a) For tractors with standard transmissions, seeing that at least one brake is set. For tractors with automatic transmissions, the selector level must be in the "park" position.
- b) For tractors with standard transmissions, seeing that the gear shift lever is in the neutral position.
- c) Seeing that the PTO is disengaged.

2. Driving the course — The contestant will notify the official when he is ready to begin driving (transmission in neutral or park, clutch engaged, PTO disengaged, and engine idling.) Timing begins when the signal to start is given by the starting official. The driver is then allowed six minutes to complete the course.

3. Stopping procedure — The course is completed when the driver has backed his tractor and trailer into the stake pattern and is satisfied with the trailer's position in relation to the stakes. After backing the trailer into the "shed" as close to the stopping stakes as possible without touching them, the driver will:

This particular sequence is not necessary as long as all operations are accomplished safely.

Timing ends when, after stopping the engine, the contestant raises both hands about shoulder height.

- a) For tractors with standard transmissions — shift into neutral and lock at least one brake.
- b) For tractors with automatic transmissions — shift lever to "park".
- c) Stop tractor engine.
- d) Scoring — Contestants will be scored upon the items shown on the score sheet.

The event will have a six-minute time limit. A penalty of 400 points will be added to the contestant's score for failure to complete the course in the allotted time. When time is called, the contestant will be stopped, and measurements will be taken. If penalties due to measurement are less than 400 points for exceeding the time limit, he will receive the lower score. In the event time is called, the penalty points received for time will not exceed 760 penalty points, (6 minutes x 60) + 400.

Two stakes will serve as the back of an imaginary shed, each located two feet in from the corner. Contestants will be penalized 20 points for each inch over two inches from the farthest stake to the back of the spreader.

Safe Tractor Driving Rules

The following rules are offered as a guide for safe tractor operation. Officials should be guided by, but not limited to, the scope or coverage of the following paragraphs:

1. After mounting tractor with standard transmission, set at least one brake, place the gear shift lever in neutral position, and disengage clutch before starting engine. For tractor with automatic transmission, shift selector lever to "part" position before starting engine.
2. Place PTO lever in neutral position before starting engine and keep disengaged always except when it is in use.
3. Engage clutch gently and avoid careless or sudden starts and stops which tend to "bounce" front wheels off the ground or cause rear wheels to "dig in".
4. Avoid unnecessary slipping of clutch when maneuvering in the driving course. The operator's foot may remain on the clutch, but "riding" the clutch is to be avoided.
5. Release brakes before starting to drive the tractor.
6. Keep tractor in gear when driving. Never shift into neutral or disengage clutch to coast part of the way.
7. Ride on the tractor. Never ride on drawbar or hitch of trailer or implement being drawn.
8. Reduce speed to a safe level before making a turn or applying one brake.

9. Do not permit extra riders on the tractor at any time.
10. Bring tractor to a complete stop before dismounting.
11. Do not use road gear while driving the course. Any gear which permits a ground speed of ten miles per hour or faster is considered a road gear.
12. Drive tractor at speeds slow enough to ensure safety, both for driver and for officials.
13. Wear clothing with snug fitting cuffs. Avoid loose-fitting baggy clothing.
14. Tobacco use while driving the course is NOT permitted.
15. Avoid short turns which will foul implement against tractor wheel.
16. When leaving tractor with standard transmission, shift into neutral, and set at least one brake, engage clutch, and shut off engine. When leaving tractor with automatic transmission, shift selector lever to "park", engage clutch, and shut off engine. This particular sequence is not necessary so long as all operations are accomplished safely.
17. Mount and dismount tractor properly. Use steps if provided by manufacturer.
18. Anyone intentionally operating the equipment in an unsafe manner will be removed from the equipment and banned from future Tractor Operating competitions at the DCLA Youth Fair and Rodeo.
